PROFILE

Experienced developer equipped with a diverse and promising skill set, seeking opportunities to further enhance expertise in a growth-oriented environment. My career spans 4 years of hands-on work with high-profile clients, including Daily Mail, Poker.org, and the London Stock Exchange, showcasing my adaptability and deep understanding of industry standards. Passionate about building scalable and robust solutions, I thrive in collaborative environments where I can continue pushing the boundaries of innovation while delivering high-quality products.

EMPLOYMENT HISTORY

Full Stack Engineer, Glide Tech

Tuzla

Jul 2021 — Jan 2025

As a part of Content Engineering team, I specialized in utilizing CMS platform to deploy reliable model structures designed to meet diverse client demands. My role involved leveraging RESTful microservices supported by cloud and unit testing to enhance performance, optimize SEO, and ensure scalability of the multi-tier applications across diverse environments. Through this engagement, I gained invaluable experience in client communication, involving both needs analysis prior to the initial release and managing post-launch maintenance.

INTERNSHIPS

Intern Software Developer, Cape Ann Enterprises

Tuzla

Nov 2019 — Apr 2020

During my tenure at Cape Ann, I had the opportunity to immerse myself in an agile workflow and write clean, efficient code. Using the MEAN Stack, I developed a web application aimed at improving employee performance assessments, gaining valuable experience in collaborative teamwork and project life-cycle management.

EDUCATION

Bachelor of Information Technology, IPI Academy

Tuzla

Sep 2018 — Mar 2022

At IPI Academy, I significantly advanced my IT understanding through several academic projects and papers on key topics such as networking, data structures and algorithms, and programming. This experience sparked my curiosity and motivated me to explore their real-world applications further.

Full Stack Developer, Bild IT

Tuzla

Jun 2018 — Aug 2019

Stepping into the world of programming, I have dedicated myself to continuous learning and improvement, ultimately achieving success in procedural and object-oriented exam, which earned me a position as a mentor. This milestone solidified my foundational understanding of full-stack development.
